

OCTOBER 2008

# STRAIGHT TALK

*"If Americans ever allow banks to control the issue of their currency, first by inflation and then by deflation, the banks will deprive the people of all property until their children will wake up homeless." -Thomas Jefferson*

## THROUGH THE LOOKING GLASS

### THE OTHER WORLD

When Alice stepped over into the other side of the mirror she found herself in a "Wonderland" that made no sense. That other world in Lewis Carroll's fantasy was mysterious and confusing ... not unlike Washington DC and Wall Street. In Alice's "Wonderland" she was faced with the "Mad Hatter" whose brain seemed scrambled (like George Bush); potions that shrank her and then enlarged her (like the U.S. dollar); and Humpty Dumpty who said, *"When I use a word it means just what I choose it to mean -- neither more nor less"* (like politicians).

Similarly, the world of Washington DC and Wall Street, and the words they speak, are very mysterious.

For instance, when Bush or Paulson tells us that the current crisis has been caused by *"leveraged assets," "hedge funds"* and *"derivatives"* ... people watching TV have no idea what that means. In fact, most people get lost at a much lower level of finance jargon ... namely, at the most basic definitions of money and banking. Very few people understand the debt/usury banking system of America ... and even fewer understand the mysteries of Wall Street.

Thus, when Americans get excited about the current panic on Wall Street you can bet they will stampede in the wrong direction because they have no idea what the actual problem is, or how to fix it ... or if it really exists at all. As usual, Americans are easily sent scurrying in any direction the politicians and bankers point them. All it takes is a false-flag event like 9-11, the warning of "weapons of mass destruction" and "mushroom clouds" ... or a contrived bank panic like we are watching today.

False-flag events are used to cause panic among the dumbed-down citizens, and create opportunities for bankers and politicians to garner great sums of money and more power. After 9-11 the government passed the Patriot Act immediately ... without even reading the bill. It gave the President's office new war powers without accountability. Now, these same folks are orchestrating another false-flag event to create a new panic and a new "economic terrorism"

so they can garner more banking powers and more ways to amass great sums of money for themselves.

Of course, my warnings will make no sense to people whose minds are in "Wonderland" on the other side of the looking glass. The only people who can begin to understand what is happening to them, and to this country, are those who realize that government and banking are criminal organizations, and the politicians and bankers are criminals. That is the first step to reality.

### ILLUSION OR REALITY ? YOU CHOOSE!

*"I didn't say it would be easy ... I just said it would be the truth."*

—Morpheus

*"The real menace ... is the invisible government which like a giant octopus sprawls its slimy legs over our cities, states and nation. At the head is a small group of banking houses... This little coterie...run our government for their own selfish ends."*

—N.Y. Mayor, John Hylan

As I write this, the government just passed new legislation to bail out Wall Street and give the US Treasury authority to buy trillions of dollars of bad debt. So we are being told that the cure to the bad debt crisis is to create more bad debt??? A remedy one might expect from the "Mad Hatter."

Thus, the feeding frenzy is beginning, and the big bankers are preying on the smaller bankers. In many ways it is a repeat of what happened in 1929-1934. A lot of small banks disappeared and a few big banks got bigger. At the same time many business disappeared and many workers lost their jobs. This is happening again right now ... and as in 1929, this event was undoubtedly planned. It is feeding time again for bankers at the top of the food chain.

For several decades the Rothschilds, Rockefellers, J.P. Morgan, and their fellow elites have been underwriting Wall

Street and helping it grow. They did this by inflating the money supply which facilitates business. Then, at the end of the inflation cycle there comes a huge wave of defaults and bankruptcies which in turn deflate and depress the money supply. This cycle has repeated many times in history. The Treasury is now preparing to buy up trillions of dollars of these worthless defaulted "assets" (i.e., non-viable debts) so Wall Street won't be stuck with the problem they created and can continue in their business of crime.

Isn't it strange that the government's remedy for the problem of Wall Street's subprime loans is to create within the US Treasury a new, larger subprime agency, and empower it to buy trillions of dollars of bad subprime debts? Does that make sense to you?

Government crooks (called "politicians") are pulling off another huge crime just like they did with 9-11, the Patriot Act, Homeland Security and the invasion and occupation of Afghanistan and Iraq. They are doing it the same way ... by lying and creating panic. Just the way they sold the Iraq War and the Patriot Act using lies about WMD and "possible mushroom clouds," they are now selling this huge power grab and bailout with lies about what will happen to us if they don't get their \$700 billion gift.

Less than a month ago Bush, Paulson, and the "mental giants" of Wall Street were going on national TV and telling us that the US economy was strong and there was nothing to worry about. Then all of a sudden Bush comes on TV and announces that the economy is broken and Wall Street requires an emergency bailout of hundreds of billions of dollars. Were they lying before ... or now? (probably both).

And you know what is even more astounding than that? Americans still look to these "leaders" as the experts who will inform us what is happening! It is absolutely insane!

Americans still leave their savings in banks, and continue to trust their government. I know that the rest of the world looks at America and laughs at us. They deride the common American ... and they fear the monstrous US Government. No wonder they hate Americans! Americans deserve to be hated ... because they support a criminal government that is wrecking the world. Americans have accepted lies and blindness as a way of life. They don't care that their government is hurting people and ruining nations. They don't care that 2% of the people at the top of the food chain have 90% of the wealth of the world. They don't care that our children are being born into a world that gives them no hope, and destroys their brains and their physical health. They don't care that the US Government laughs at God, or that it considers Jesus a myth.

In short, Americans don't care about anything except comfort and entertainment. And because of that, God is letting us reap what we deserve: CHAOS, DISEASE AND INSANITY! The one thing our generation has not yet seen is rampant poverty ... BUT THAT IS ON ITS WAY.

I have been telling you for the last few years that America is GONE! What exists in its place is a country that I no longer recognize. The government and the people are strangers to me. If I were younger I'd probably be making plans to move to South America. I have no connection to

this society anymore. I think I know how Jonah felt. America has become a stench and a shame to God. The fact that the majority of Americans are of Israelite descent only makes the whole thing more tragic and crazy. Of all the people on Earth, Israelites (our racial brethren) have the least excuse for being ungodly.

## WHAT IS REAL AND WHAT ISN'T?

I know there are some out there who aren't comfortable living in "Wonderland" on the wrong side of the looking glass, and would like to live in a world that makes sense. For you I will attempt to bring reality – at least some of it – back into focus. Let us start with a few basics.

First, you must start with the realization that the system of government and society into which you were born is **criminal and against the laws of God**. Get that straight right now! This system is not merely weak. It is not merely compromised by a few bad people. It is unfixable. It cannot be restored to a good system ... because it never was good in the first place. It is THE ENEMY of God, and it must be rejected ... at least in your heart.

You must stop looking to it, or any part of it, for help or for hope of any kind. It is Babylon! It is "the dragon" of Daniel and Revelation. It is The Beast System.

If you cannot do this one thing, at least temporarily; if you cannot mentally set aside this ungodly system long enough to look beyond it to see if anything else is out there, then you are still unteachable. You are wasting your time reading this. You are still in "Wonderland," and what I am explaining will not reach you.

## MONEY BASICS

The money system of the United States is a system of DEBT. Normally, people assume that money equals wealth. But not so! A FED Note (dollar) represents DEBT, NOT WEALTH. Fed Notes are loans from the Federal Reserve. When we exchange Fed Notes we are trading loans (debts) just like Wall Street.

The whole system is based upon debt and usury. Usury (interest on loans) is against God's law. According to God's law loans are supposed to help people ... not encumber and enslave them. Usury (interest) is forbidden.

In God's law, the purpose of making a loan is to help someone who is in need. Loans are for charity ... not for profit or to take advantage of others. Scripturally, a loan to a brother must be forgiven (written off) if not repaid by the end of the sixth year of the seven-year-cycle.

Furthermore, if a borrower comes to hard times and is truly unable to repay the loan, the lender is not allowed to foreclose on him. In other words, Biblically (i.e., within God's system - the ecclesia) you should not offer a loan unless you are prepared and willing to write it off as charity if the borrower comes to hard times and can't repay.

In either case, all loans are written off (whether or not they are paid) every 7th year. Furthermore, the cycle of 7 years is fixed ... that means if you make a loan in the third year of that cycle, the loan retires after three more years.

These laws are spelled out in the Books of Moses. You

can look them up for yourself. You can also order MOSES THE ECONOMIST from us (\$10) to understand the laws of a sound economy.

But remember, U.S. laws governing money and the economy are totally opposed to the laws of God. The most outstanding and recognizable is the practice of charging interest (usury) on loans. The entire banking system is based in this doctrine. Usury (interest on loans) is the most lucrative and wicked element of the Beast money system.

All U.S. dollars issued into circulation are created out of thin air by the bank at the time of the loan. They come into existence at that moment ... and they go back out of existence when that loan is repaid. The authority to create dollars through loans comes from the Federal Reserve System. Today, every bank belongs to the FED System. No bank is allowed to exist outside the system.

When a bank issues (creates) dollars by loaning them into circulation, the borrower agrees to repay the original amount PLUS a certain percentage of interest (usury). This automatically creates a debt that cannot be resolved ... because the dollars required for paying the interest were never created. For instance, at 10% interest a loan of \$1000 would require repayment of \$1100. But since the additional \$100 is not created by the loan, that interest can never be repaid ... because it doesn't exist in the money supply. Only the principle exists.

Therefore, the borrower (debtor) has agreed to do the impossible ... and will be held responsible for the debt that cannot be paid. Banks make loans to citizens who are then permanently and irrevocably indebted (enslaved) because the debt can never be fully extinguished. The only way to repay such a loan is to make a second loan ... which then doubles the unpayable interest (usury). Or you can get hold of someone else's money (which came into existence by a loan from a bank) and use it to repay the interest ... leaving the other person unable to repay his debt with interest ... who must in turn do the same to some other debtor. It creates a wave of debt that overwhelms and enslaves us.

Sounds ridiculous doesn't it? Well guess what ... IT IS! It is insane ... unless you are a criminal (i.e., a banker) ... then it sounds like a slick deal. Multiply that scenario a billion times and you can begin to imagine what's happened to America's economy. And what is really insane is the fact that this ridiculous banking scheme is the very system Americans have accepted with pride, and have lived with ever since the first bank was established in America ... which, by the way, was long before the Federal Reserve was born. Usury banking is the greatest and most successful crime (sin) in the history of mankind ... and most Americans willingly accept it. But judgment time has come!

The Federal Reserve System was established in America in 1913 for the benefit of the criminals of government and banking. But the crime itself was not a new one. The crime of usury banking was established in Europe and England centuries before it came to America. In fact, eons before it appeared in Europe and England it was practiced and perfected in the temples of ancient Babylon.

Banking and government go hand-in-hand. Government

establishes itself by military might. Then the bankers step in to keep the citizens enslaved to debt so they don't have to be re-conquered every few years.

### **WHAT ARE THEY DOING TO US TODAY?**

Now, if you can grasp the basics that I just explained, then we can go on to touch upon what has been happening in America during the last few weeks. And, you need to know that it is not just happening in America, but all around the world. The Federal Reserve System has been operating internationally ever since World War II ... doing to the world what it had already done to America.

Here in a nut shell is what has happened. The FED is a private corporation established in 1913. The stated purpose (which was a blatant lie) was to stabilize the economy and prevent booms and busts in the money system.

It took them only 3 years to start WWI, and another 13 years to inflate the economy to the breaking point. After WWI, and through the "roaring 20's," the FED inflated the money supply with easy, cheap loans, and the huge government expenditures to fund the war. All that money invigorated American businesses and entrepreneurs, and industry grew by leaps and bounds. All that money is what made the 20's roar. Inflation, early in the cycle, always creates wealth for investors. Wall Street makes billions.

Then in 1929 inflation reached its peak. The dollar had lost its buying power and people were unable to make their payments on their homes and cars. People and banks quit borrowing because business quit being profitable. The banks began calling in the margin investments on Wall Street. Traders could not meet their obligations, which caused banks to default and Wall Street crashed. It took about three years for the crash to bottom out.

The effect of the crash was that the big banks bought out the small banks at fire-sale prices, and more power was concentrated into the central banks and government.

The process is like growing a crop. The bankers and politicians at the top of the food chain create inflation for a number of years to grow the crops ... i.e., to facilitate the growth and expansion of business and commerce. Then, when the crop is large and ripe for picking, these elite bankers create an emergency (real or imagined) and push the nation (or the world) into a deflationary crisis ending in a depression. In the process the big banks (J.P. Morgan & friends) harvest the smaller banks and businesses ... further consolidating and centralizing the power structure.

### **HOW BAD IS THE INFLATION?**

Before the October bail out, America's gross national debt was increasing \$2 million per minute. That's \$3 billion per day. Wall Street owes China \$2.5 trillion. America's overall debt is estimated to exceed one quadrillion (1000 trillion) dollars. Ever heard of "quadrillion" before?

Inflation is required for the U.S. banking system to exist. Without inflation the system could not continue. Since the system must inflate to exist, it necessarily must go through cycles of inflation and then deflation ... over and over and over. And each time the cycle repeats the common

people lose more freedom and wealth, and the government and bankers gain more and more. It is as dependable and predictable as night and day.

What? Did you think you were living in a free country?

### **EXAMPLE OF INFLATION**

In Zimbabwe today we can see an example of how inflation banking works, and what it brings to a nation. Every day that the banks in Zimbabwe are open the people line up for blocks to hopefully withdraw the maximum amount of Zimbabwean currency the government allows – the equivalent of a dollar or two in American currency.

Zimbabwe is in the grip of hyperinflation. The withdrawal limit rose recently, but with inflation surpassing 40 million percent, the currency loses its buying power before people can get it from the bank to the market. The rate of inflation went from 1,000% in 2006 to 12,000% in 2007 – to a figure so high today that the government had to lop 10 zeros off the currency in August to keep the nation's calculators from being overwhelmed. \$1 American was worth about \$10 trillion Zimbabwean.

Zimbabwe's economic unraveling is largely the result of President Robert Mugabe's policy starting in 2000 of taking over thousands of White-owned farms and giving them to his friends. The big farms now produce less than a tenth the corn – the main staple food crop – that they produced in the 1990s. Also, financial help from Europe and America has dried up. Mugabe is compensating by printing more and more notes which are becoming nearly worthless.

I can hear some folks saying, "It serves them right." And, yes I agree ... it serves them right. But guess what? Look at your own country! See what is currently happening to US! And guess what? IT SERVES US RIGHT TOO!

The government of America is every bit as corrupt and horrible as the government of Robert Mugabe. The big difference is that the U.S. Government is big enough to protect its interests with its huge military force.

One more thing. The people lining up at the banks in Zimbabwe may look a lot like the people lining up at the banks here in America before long. I'm already hearing rumors of a possible shutdown of the stockmarket.

### **CORPORATE WALL STREET FASCISTS HAVE TEAMED UP WITH THE FASCISTS IN GOVERNMENT**

The working definition of National Fascism is: the merger of government with corporations. This was the model of Benito Mussolini and Adolf Hitler. It has also been the model for Wall Street since before WWII. Wall Street loved Mussolini and Hitler. Next month's STRAIGHT TALK will explain and expose this dark history of American politics.

The current Wall Street/Congress coup ("bailout") proves what I'm saying. The bankers and Wall Street have run the US Government the same way London bankers have run the government of England. The House of Rothschild banking cartel gained control of the governments of Europe 300 years ago. The Rothschild model of banking has been adopted in nearly every nation of the world. New York City's Wall Street and the New York Stock Exchange are now the

world headquarters for this model of banking.

If you ever had any doubt who it is that runs the US Government, you should now know the answer. After the past few weeks of Bush, Paulson, Pelosi, Reid, McCain and Obama dancing to the tune of Wall Street, the truth should be obvious to everyone.

J.P. Morgan started the tsunami that washed over the American economy in 1929-34. J.P. Morgan's bank, and its close financial associates, are still at it. They are the big fish at the top of the food chain.

From 1929-1934 these big fish ate up all the little fish, and nearly all the small banks in America ceased to exist. Today they are doing it again. J.P. Morgan, Bank Of America, and Citibank are feeding, growing, and becoming the biggest banks in the world ... and they are doing it by buying out the failed banks.

Now, with the so-called "bailout" that Congress just enacted, these three mega banks will be able to redeem all those bad "assets" (defaulted sub-prime loans, and billions of derivatives and leverage contracts) purchased at fire-sale prices. Now they can sell those bad debts at a profit to the U.S. Treasury. Then U.S. Treasury will hold the bad commercial papers ... instead of the banks holding them. That will make the U.S. Treasury the biggest sub-prime banker in the world. They claim to be curing the bad loan debacle by guaranteeing trillions of dollars of more bad loans.

The whole process is nutty, and the world is watching the U.S. with amazement ... and disgust. America's financial supremacy position in the world is done. America's military supremacy will be declining soon as well.

This is what comes of U.S. political, religious, and military **GODLESSNESS**. The U.S. is rusting and rotting out at her core. The people of America are beginning to feel the pain in their pocket books. It's too bad Americans didn't have the character to feel the pain of the great sins and cruelties perpetrated in and by American society and its government over the past decades. Its too bad Americans didn't repent from killing millions of unborn babies. Its to bad Americans didn't feel the pain and cruelty as the U.S. Government bombed and murdered and destroyed innocent families all over the world.

Its too bad Americans feel the pain only when it is in their pocket books. But, hey... whatever it takes. Now Americans are finally getting concerned. Well, sorry ... but it may be too late. The pain is just beginning. Times are going to get tougher. Get ready for bread lines and martial law. You'll soon be seeing military troops in the streets of big cities. Its coming. You've not seen it here in your lifetime, but you will now! Northcom has already ordered troops into some states ... preparing for "civil unrest."

### **GET YOUR MONEY OUT OF THE BANK NOW!**

Leave only enough in your account to conduct your necessary business. Buy yourself some canned food for storage. If you don't have enough backbone for this ... then you deserve what is going to happen to you.

Pray for truth!
